DOORS BY DESIGN

Introducing our collection of high quality PVCu doors, individually created to help you choose the perfect door for your home.

With styles to suit every type of property, traditional or contemporary, our doors are constructed from the highest quality PVCu to keep them looking good for years with only the minimum of maintenance.

Manufactured using state of the art techniques and materials, our doors have outstanding acoustic and thermal qualities and the latest security features for complete peace of mind.

Each door within the collection is custom built with the glazing option of your choice.

A browse through the following pages will reveal the stunning combinations possible with our unrivalled collection of decorative, coloured, bevel, Georgian bar, classic lead, sandblasted (etched) and resin bevel designs.

Each door panel carries its own "U value".

For further information please see our technical information details.

** Due to the nature of our products and the limitations of the printing process, no liability can be accepted for the accuracy of the colours or designs depicted, which are intended for guidance only.*

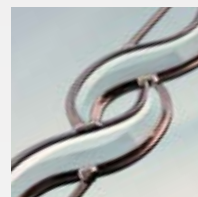

Lead & Film

This process incorporates self adhesive lead and colour film to replicate traditional stained glass designs, all external joints are soldered.

Glass Bevels

Incorporating hand crafted glass bevels which are applied to the glass and finished with lead work, external joints are soldered.

Etched Glass (Sandblasted)

Beautiful designs using the latest technology to reproduce what would have originally been manufactured using a sandblasting process.

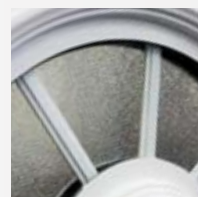

'Resin Bevels'

Designs which are complex yet delicate, using the latest technology these unique designs cannot be reproduced by any other process.

Glazing Bar

This process incorporates PVC or aluminium bars encapsulated within the double glazed unit ensuring ease of cleaning.

Glass Tiles

These designs incorporate either kiln fused glass tiles or sparkling clear bevels on a sandblasted effect base glass.

Triple Glazed

The beautifully hand assembled and soldered panes have the benefit of triple glazing preventing oxidation or discolouring of the lead. The easy to clean units also provide superior heat and sound insulation.

Lead Finishes

Full design and reproduction service available, prices on request.

N.B. GGF guidelines apply.

Lead is a natural product which when exposed to the environment will undergo certain atmospheric transformations. This is perfectly natural and will eventually settle down to take on a natural weathered lead appearance.

Laminated Colour Options

The "Superior" colour range is a unique and exclusive collection of weatherable, durable and scratch resistant foiled PVC coloured options. The coloured foils are laminated onto the PVC substrate during the extrusion process and produce a permanent bond between the substrate and decorative foil.

Colours are as accurate as the printing process allows.

Other laminated foil colours available on request.

NB. It is highly recommended that laminated woodgrain products should not be installed in South facing locations.
